**Executive Summary**

To customize X\_TRADER® Pro, TT offers a library of more than three-dozen plug-in applications. These products expand the functionality of TT's already powerful trading platform. Some plug-ins also are available with the standard X\_TRADER screen. For more information, consult the one-page product summaries, which contain a product synopsis, key features, a screen shot, requirements and user recommendations.

**Customer Overview**

Plug-ins can be grouped into four predominant user categories: Risk Administrators, Individual Traders, Brokerage Desks and Buy Side Clients. The chart below will help you determine which products are best for you or your customers. Be advised that many of these products can span across user groups. These recommendations should be consulted as a general guideline.
